

Practical-4

Practical title: JavaScript DOM Manipulation, Event Handling, and UI Interactivity

Add dynamic UI components such as collapsible FAQ, modal popup, image/content slider, notification banner, hamburger menu, and light/dark theme switcher using JavaScript.

A.Theory

1. How are DOM elements selected and modified?

Ans:

DOM elements are selected using JavaScript methods such as `getElementById()` and `querySelectorAll()`.

2. Are event listeners attached correctly?

Ans:

Yes. Event handling is implemented correctly for the interactive components.

3. Is `localStorage` used for remembering theme choice?

Ans:

No. In the current code, `localStorage` is not used

4. Does interactivity improve usability without breaking accessibility?

Ans:

Yes, mostly. The interactive features improve usability by making the page easier and more convenient to use.

B. Implementation/ Output/Result
